

TGI Consumer Data

A guide to our main surveys

TGI consumer data is an essential tool for media agencies, media owners and advertisers in understanding, engaging and reaching key consumer audiences.

Used in Britain and around the world as the media industry's data currency in the mediaplanning and buying process, TGI offers unparalleled depth and breadth of consumer behaviour, characteristics, attitudes and media consumption.

We undertake a range of surveys across different geographies and a variety of consumer audiences. This guide summarises what is available on some of our most prominent surveys.

Great Britain TGI

All adults aged 15+

TGI Europa

Harmonised understanding of consumer behaviour across Britain, France, Germany and Spain

Northern Ireland TGI

All adults aged 16+

TGI Global Quick View

Harmonised consumer behaviour in key sectors across 35 countries worldwide

Republic of Ireland TGI

All adults aged 16+

About Great Britain TGI

TGI Great Britain data is trusted and used every day by hundreds of communications agencies, media owners and advertisers and is built on a highly robust adult sample.

How the study works

We interview a representative sample of over 24,000 adults aged 15+ every year in Great Britain about their behaviour and characteristics.

Our in-depth behaviour coverage

Offline and online consumer behaviour includes:

Directly claimed data:

- Use of 4,000 brands across 600 product areas
- 300 attitudes and motivations
- Leisure activities
- Media consumption (overall and specific media brands)

Northern Ireland TGI

The who, why and how of consumer behaviour

TGI Consumer Data – A Unique Solution

Data from our TGI consumer survey makes media planning and selling far more effective for all players in the media industry. No other solution reliably measures consumer behaviour and characteristics with such breadth and depth.

In-depth coverage of all online and offline media types & brands

Over 250 attitudes & motivations across a wide range of topics

Leisure activities

Demographics

Profile and plan with globally harmonised consumer data

Comparable data from over 80,000 connected consumers in 36 countries worldwide

TGI Global Quick View provides a holistic picture of online consumers that enables you to profile the digital media consumption and purchase preferences of audiences at a global level.

As well as profiling global audiences, TGI Global Quick View data can be complemented with individual TGI national studies for enhanced and in-depth localised media planning.

TGI Country Datasets cover both global and domestic brands in great detail and are typically the local currency for media planning.

Conduct multi-country analysis with TGI Snapshot

TGI Global Quick View data is accessed through Kantar's data visualisation tool, TGI Snapshot. The intuitive software – optimised for the international dataset – is loaded with new features to help users identify global trends and compare connected consumer variables across markets.

Interactive maps

Quickly identify countries of interest for your audience with a global and regional view.

Target comparison

Create your own lists of targets for quick comparisons.

Country statistics

Immediately get statistics for your targets on single countries or combinations of them for multi-country analysis.

Auto-filtering

Making the analysis of international data easier and error free. Results are automatically filtered by the countries where your target is available and visual signposting aids the selection of profiling variables for that geography.

Quick Reports

Interactive data visualisation that can be downloaded into PowerPoint slides.

TGI Global Quick View data is also accessible in TGI Choices Online.
